

Brain Model Error Tracking Report

Total Episodes: 500

Final Reward: 45.00

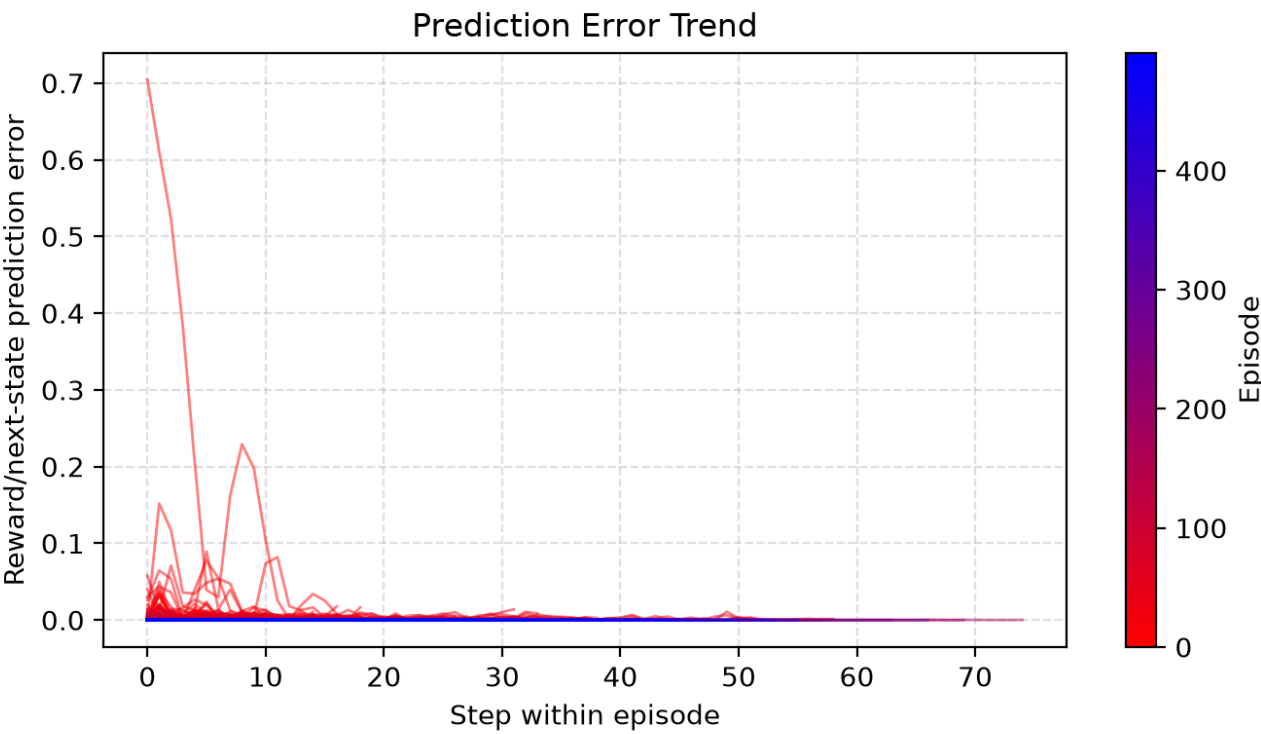

Peak Reward: 75.00

1. Learning Performance

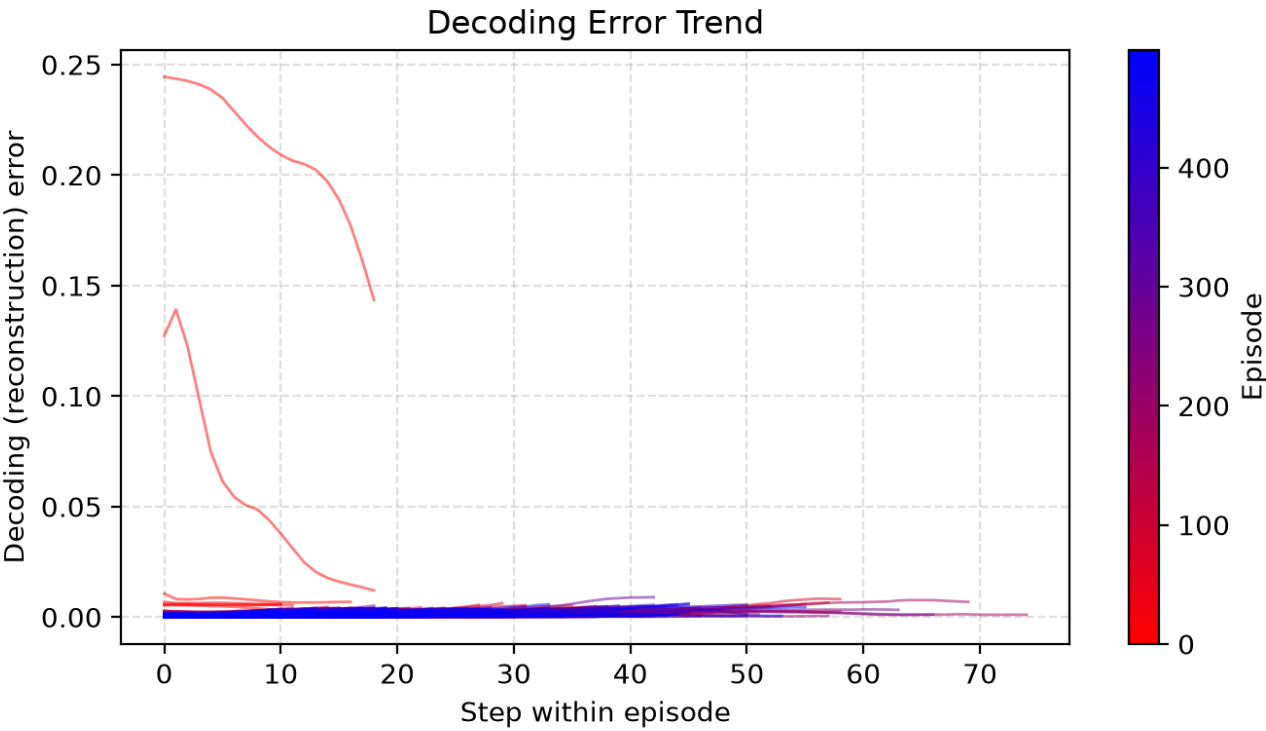

2. Prediction Error Trend

Each line is one episode's error over its steps. Color moves from red (earliest episodes) to blue (latest episodes) to reveal whether error is shrinking across training.

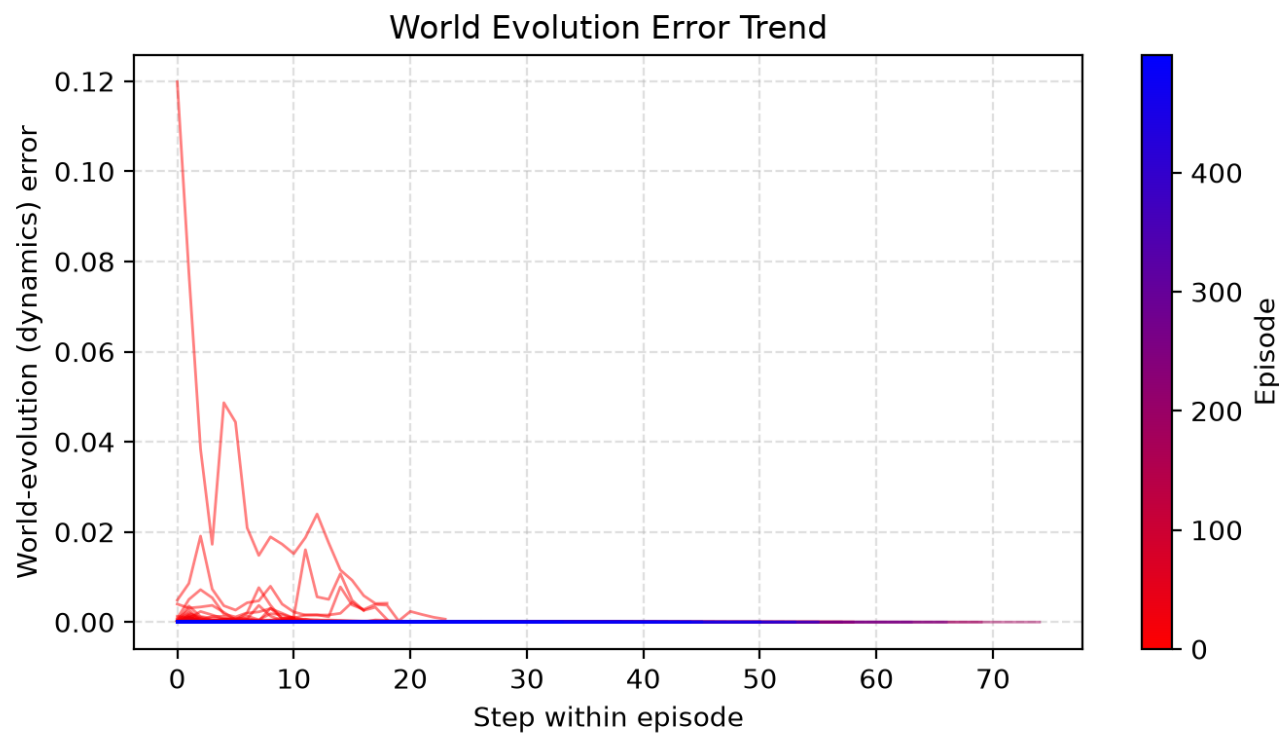

3. Decoding Error Trend

Each line is one episode's error over its steps. Color moves from red (earliest episodes) to blue (latest episodes) to reveal whether error is shrinking across training.

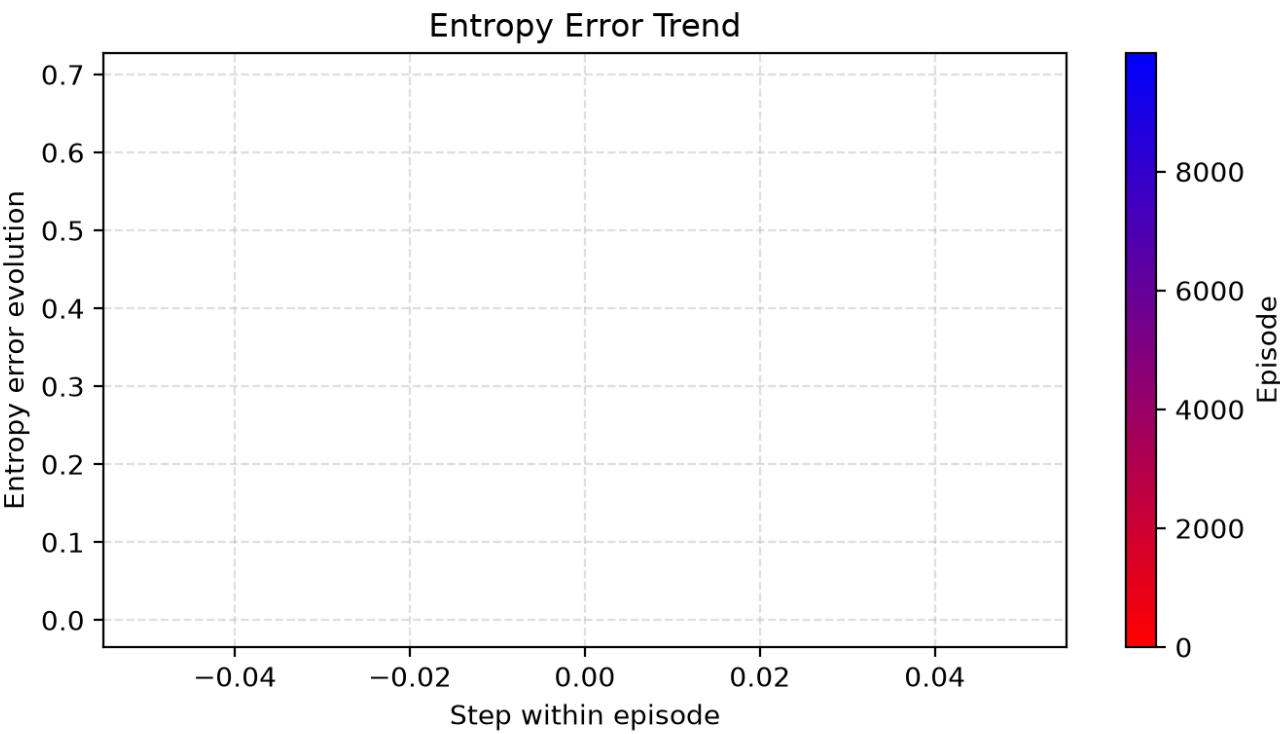

4. World Evolution Error Trend

Each line is one episode's error over its steps. Color moves from red (earliest episodes) to blue (latest episodes) to reveal whether error is shrinking across training.

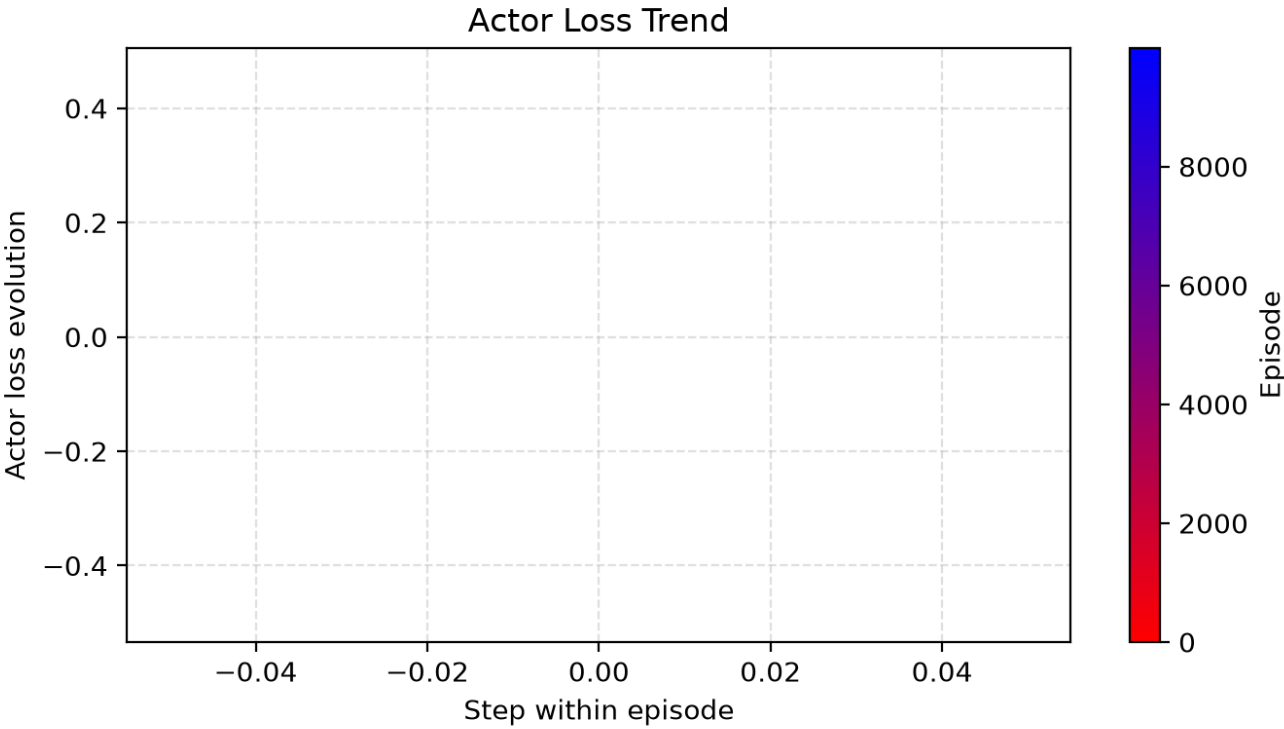

5. Entropy Error Trend

Each line is one episode's error over its steps. Color moves from red (earliest episodes) to blue (latest episodes) to reveal whether error is shrinking across training.

6. Actor Loss Trend

Each line is one episode's error over its steps. Color moves from red (earliest episodes) to blue (latest episodes) to reveal whether error is shrinking across training.

7. Replicated Behavior (Evaluation Rollout)
